QUALTIN

prolonged hand of your information system

# DATA COLLECTION IN PRODUCTION

# WAREHOUSE MANAGEMENT

ACCESS CONTROL

QUALTIN

Software tool, that enables any information system to easily control PCs, PDAs and special industrial terminals Sembox. Thanks to Qualtin you can communicate through above mentioned stations with various peripheries like scanners, printers, scales, PLCs and other devices.

The communication between Qualtin software and information system is based on exchange of easily structured file. As a result, this solution can be used for traceability in production process, access control and many other applications.
